Japanese Fern Balls

One of the most interesting novelties of recent years, of easy growth and requiring little care. **Unique and Beautiful**--A perfect hanging basket of delicate Japanese Ferns.

The Culture is Very Simple.

On being received, all they need is to soak them overhead in a pail of water and then hang them up in a moderate heat and slightly shaded. They start growing in six or eight weeks with no other care than keeping them moist. **Price, 75c each.**

Our **Central Farm Lawn Grass** IS IN GOOD DEMAND.

And when ordinary care is used gives unbounded satisfaction. It has been used extensively by the Ottawa Improvement Commission and by the Corporation of Ottawa on the City Parks. It is composed of only the highest grade Grasses and White Dutch Clover, and is just suited for the Canadian climate. A lawn put down with our **Central Farm Lawn Mixture** is much less likely to winter kill than a lawn put down with sods and the cost is trifling as compared with sodding. **Per lb., 20c.**
